Profile Summary

Senior Unity Developer with *nearly 6 years* of experience building interactive PC/mobile games and immersive AR/VR applications. Proficient in Unity (2D/3D), C#, XR, and related tools, with award-winning projects including Spacey's Adventures (*AR/VR Game of the Year nominee, IGDC 2024*) and Planets AR (*150k+ downloads on Android/iOS*). Skilled in game design and development, AR/VR, spatial mapping, indoor navigation algorithms, and performance optimization, with a track record of delivering engaging user experiences. Recognized for leadership and public speaking at major industry events such as Xbox Game Camp Asia & Unity Day, along with showcasing work at international gaming conferences such as IGDC & IGS.

Key Skills

Domain Expertise – App Development, Game Development, Augmented Reality (AR), Virtual Reality (VR)

Tools & Languages – Unity, C#, ARCore, ARKit, Blender, Kotlin, Flutter, Firebase, REST API, WebSocket, Git, GitHub

Work Experience

IndiGo (via Randstad)

Senior Unity Developer | Nov 2024 – Present (*Full-time*)

- Managing the ***end-to-end lifecycle*** *of* ***casual mini games*** for the IndiGo app, for increased passenger engagement and brand interaction through offline in-flight and airport entertainment experiences.
- Leading the *architecture, design & development* of a ***world-first AR seat-booking system,*** overseeing full UX flow, 3D interactions & *React Native-Unity integration,* to deliver a seamless, *first-of-its-kind* experience.
- Deployed *gamified PC/VR* app for internal training with ***AI-generated avatars*** & ***voiceovers*** of employees.

ARway - Nextech AR Solutions (*4 Years*)

Senior Unity Developer | Mar – Jul 2024 (*Full-time*)

- Engineered ***turn-by-turn navigation*** algorithms with *A* & KDTree,* to optimize pathfinding for *large multi-floor venues*, for smoother rerouting & faster course correction, contributing to a ***100%+ QoQ user growth***.
- Designed ***custom UI, 3D models*** & ***particle effects*** to improve AR navigation and boost user engagement.
- Created an ***editor tool*** to *automate SDK setup*, eliminating manual configuration and integration errors.

Unity AR Developer - Founding Engineer | Aug 2020 – Feb 2024 (*Full-time*)

- Integrated ***precise real-world localization*** & *visual landmark anchoring* with *Azure Spatial Anchors & QR.*
- Engineered ***custom plugins*** to *create/view PCD files*, adding *point cloud visualization* capabilities to Unity.
- Built and shipped ***scalable, location-based apps*** & ***games*** for clients, using our indoor navigation SDK, deployed globally across large-scale, high-traffic public, commercial, and enterprise venues.
- Optimized asset management to *improve runtime performance* & *minimize memory footprint* in AR apps.

Round Them Oranges (*5 Months*)

Unity VR Developer | Jan – May 2021 (*Contract*) – https://roundthemoranges.github.io

- Created a *web/VR art gallery,* sustaining art engagement and broadening global exposure for artists.

Noora Health (*3 Months*)

Unity AR Developer | Apr – Jun 2020 (*Contract*)

- Developed *Virus Warrior* & *PPE Trainer*, leveraging ***interactive gameplay*** & ***AR simulation*** to raise public awareness and safety training of ***1,000+ frontline nurses*** in proper use of PPE equipment during COVID-19.

Personal Projects

Headshot – https://agrmayank.itch.io/headshot

A *fast-paced FPS* with short, time-limited levels, performance based grading, and precision driven mechanics that create a strong risk/reward loop, with stylized visuals for an engaging and replayable gameplay.

Planets AR – https://planetsar.agrmayank.com

An educational AR app with ***150k+ downloads,*** that brings our solar system to life, featuring all the planets, dwarf planets, & moons, across *Android, iOS, MacOS, & JioGlass XR* platforms.

Spacey's Adventures – https://play.google.com/store/...?id=com.AgrMayank.SpaceysAdventure

Nominated for the ***AR/VR Game of the Year*** at IGDC 2024, Spacey's Adventures is a *rogue-lite space shooter* where you battle waves of enemies, collect power-ups, and upgrade your weapons in an immersive setting!

KeyBound – https://store.steampowered.com/app/3070700/KeyBound

Keybound is a *rogue-vania* action-platformer where players *reclaim lost keys* to unlock new abilities, while navigating ***procedurally generated levels*** filled with challenging enemies and dynamic obstacles.

Wordfall – https://agrmayank.itch.io/wordfall

A *cozy, re-playable* ***casual word-building game*** featuring a 500K+ word English dictionary, where players form words from falling letters to climb a linguistic tower, expand their vocabulary, and set new high scores.

Bravery of the Coward – https://agrmayank.itch.io/bravery-of-the-coward

A 1-bit platformer with ***multiple endings*** that explores themes of light, dark, and of moral choices, where the *player decisions shape* the story, the upgrade path, and the world around them.

InAssist – https://youtu.be/pZtLij9ytS0

An AR tool for ***visualizing home interior designs***, allowing users to see how different furniture & layouts will look in their own physical space, thus enhancing the decision-making process during renovations.

Honors & Awards

Ranked 1st, Avalanche | NeuraNode Game Jam | 2025 – https://akamaestro.itch.io/reactron

A neon shooter where every shot sparks unpredictable chain reactions in an atomic battlefield.

Phase 3 Finalist, WAVES XR Hackathon | 2025

"Style Sphere" a VR clothing try-on experience for Meta Quest 3, to visualize fit & appearance before purchase.

AR/VR Game of the Year Nominee at IGDC | 2024

Nominated for the IGDC awards, highlighting innovation & unique gameplay mechanics.

Xbox Game Camp Asia by Microsoft | 2024

Led my team, shortlisted as one of the 4 teams from India, for Microsoft's XBOX Game Camp Asia.

Top 10 Finalist, BYOG Game Jam | 2023 – https://agrmayank.itch.io/timebound

Led the development of "TimeBound", which ranked in the *Top 10* at the BYOG Game Jam by IGDC.

Speaker & Made with Unity Showcase at Unity Day | 2019

Invited as a speaker to showcase "Foggy Forest", *shortlisted as a Made with Unity game* by Unity.

Education

Trident Academy of Technology (TAT), Bhubaneswar | 2016 – 2020

B.Tech – Information Technology

- Developed "Tri-Netra", an ***AR-based navigation system*** with *custom 3D model* replica of the college.
- Led a team to design & build a ***3D-printed spider-bot*** integrating AR & IoT at Cisco thingQbator.
- Launched an ***e-commerce website*** using WordPress, with Shopify & Amazon Affiliate integration.
